## ❖ Project Profile

<b>Project Name:</b>	E-MART
<b>Type of Project:</b>	PHP Website
<b>Project Description:</b>	E-mart is a website which provides a medium to connect seller and buyers in the e-commerce industry.
<b>Team Size:</b>	3 member
<b>Front End:</b>	PHP CSS3 HTML5
<b>Back End:</b>	MYSQL
<b>Tools used:</b>	XAMPP ADOBE DREAMWEAVER 2015

# E-Mart

## Definition:-

E-mart

## Abstract:-

- E-mart is a website which provides a medium to connect seller and buyers in the e-commerce industry. It reduce time, effort, and expense of consumer and on the other hand provides a platform for the seller.
- The objective of this project is to develop general purpose e-commerce store where any product can be brought from the comfort of home to the internet.
- For the entrepreneur, electronic shopping, generates new business opportunities means that there is a wider scope of consumer it makes comparative shopping possible.

## Modules:-

1. Admin
2. Buyer
3. Seller

### 1. Admin:-

- Log In
- Manage Buyer
- Manage Seller
- Add / Remove Products

### 2. Buyer:-

- Register
- Log IN
- View Products
- Add to Cart
- Place Order

### 3. Seller:-

- Log In
- Sell Products
- Update Order Status

### **Advantages:-**

- E-mart offers several advantages to consumer and companies including improvements of productivity, customer satisfaction and general overall productivity.
- E-mart provides a wider scope of consumer that can be attained by the entrepreneur.
- This will create an easier way for customer to buy items that the business is offering and also can view reviews of the product and customer service.
- Customer would now be able to view and get update on their favourite brands or products and special discount that apply and would be able to make purchase any time.
- Customer will have direct access to the product information, company, promotion and much more.

### **Limitation:-**

- Geographical limitations.
- Product information must be update at arbitrary interval.
- Payment methods are limited.

### **Future Scope:-**

- Widen the range of product sold.
- Provide more payment methods.
- Widen the geographical area.

## Specification

### Front End:-

- PHP (5.6.8)
- HTML5
- CSS3
- JavaScript

### Back End:-

- MySQL 5.5.32

### Other Tools:-

- XAMPP Software Package (3.2.1)
- Adobe Dreamweaver CC 2015

### PHP:-

- PHP is a server scripting language and a powerful tool for making a dynamic and interactive web pages.
- PHP is widely used, free and efficient alternative to competitive such as Microsoft's ASP.
- PHP is a free software (Open Source) related under PHP license.
- Founder of PHP is Rasmus Lardorf. PHP was written in the 7 programming language in 1994.
- Original meaning of PHP is Personal Home Page.
- Core PHP was rebuilt by Zeev Suraski and Andi Gutmans in 1997 and names "Hypertext Pre-processor".

### MySQL:-

- MySQL is open source relational database management system that relies on SOL for processing data in the database.
- MySQL falls under the GNU General Public License.
- MySQL is most commonly used for web application because of its speed and reliability.
- MySQL provides a very high performance and it is multi-thread and multi-user relational database management system.
- MySQL is very lightweight application and support indexing and binary object.

## **XAMPP:-**

- XAMPP is a light-weight easy to install bundle that will allows us to do local development on website in case we don't have server hosted.
- It is an open Source licensed product.
- XAMPP consist of three main things that we need to know is:
  - Apache web Server
  - PHP
  - MySQL
- Hence, this three things are included in the XAMPP.

## **CSS:-**

- A cascading Style sheet contains style rules that are applied to element in a webpage.
- CSS defines how HTML elements are to be displayed.
- CSS saves a lot of work and external style sheets are stored in CSS files.

## **JavaScript:-**

- JavaScript is a programming language of HTML and the Web.
- JavaScript is a dynamic Programming language.
- It is most commonly used as part of web browser, whose implementation allow client-side script to interact with user, control browser, communicate asynchronously, and alter the document, content that is displayed.
- JavaScript is multi-paradigm language, support OOP, imperative and functional programming Style.

## **Scope of Project**

### **Problem Identification:-**

- There is not many website such that all variety of products are available.
- When the courier guy comes the buyer may or may be not at home.
- There is not such type of service like home delivery, COD for food products.
- Difficulty in buying & comparing products.
- Seller have a limited scope of geographical area.
- In a single local store, they don't have all the variety of products.

### **Expected Outcomes:-**

- Buyer will get the home Delivery and cash on delivery.
- Buyer will get the delivery at their preferred time.
- Buyer will get all the variety of products that they can't get from a single local store.

## Detailed Summary of Project

- The name of the website is E-mart which is made especially for purpose of buying grocery or any daily usable products in for prize.
- Many types of services is provided by E-mart like person will get description of all product but it is not necessary that visitors must have to buy things or products, they can also visit our website for getting information about products and compare them.
- Our website consist of main three modules.
  - Buyer
  - Seller
  - Admin
- First of all, buyer signup or goes into guest mode. In guest mode he/she can't buy products, he/she only can view and get information about products.
- After signup, he/she Sign IN and then surf our website for desired products. He/she can also add products into wish list or cart and also place order and select time for delivery and simply logout.
- Seller is the person who will sell or deliver the products according to order and time.
- Seller check the database and get information of order and deliver products to buyer.
- Admin manages the whole website and have a full access over the website.
- Admin can add and remove products change the price and info.
- Admin also can see the profile of buyer and seller and manage them.

## **Requirement Analysis**

### **Project Solving Techniques:-**

- Bottoms-up approach.
- It is the pricing together of system to give rise to grander, thus making the original system, sub-system of element system.
- In a bottom-up approach the individual base elements of system are first specified in great details.
- These elements are then linked together to form larger sub-system, which then in turn are linked, sometimes in many levels, until a complete top-level system is formed.
- Incremental model is a popular version of the system development life cycle model for software engineering.
- By this way, it is easy to make a grander system by small modules.

### **Project life cycle model (Incremental):-**

- Project life cycle model is incremental model.
- Incremental model combines elements of the linear sequential model with the iterative philosophy of prototyping.
- In this, incremental model first increment is called core product.
- In core product basic requirement are added but some unknown supplementary features remain undelivered.
- This core product is used by customer to evaluate the system and next increment is planned to develop.
- During first requirement analysis phase, customer and developers specifies as many requirements as possible and prepare documentation.
- First version of product with minimal and essential feature is launched to market.
- Based on the feedback and experience with this version, list of additional features are added.
- This process is repeated following the delivery of each increment, until the complete product is produced.

### **Advantages of Incremental Model:-**

- We can add feature/modules as per our need.
- Less cost and time is required to develop core product.
- It can result in better testing, because testing each increment is likely to be easier than testing entire system.
- Incremental funding is allowed, means only one or two increments might be funded when the program starts.

## Software Requirement Specifications

Person	Main Activity	Database Activity	Activity	Document
Buyer	Sign-up	Create	Cart Table	
		Update	Buyer Database Updated	
	Login	Create		
	Product add To Cart	Update	Cart table Updated	
	Place Order	Update	Cart table Updated	
		Update	Current Order Table Updated	
		Update	Order Details Table Updated	
	Order Cancel	Update	Update Order Status In Current Order Table	
	Order Delivered	Update	Finished Order Table Updated	Bill Generated
	Order Replace	Update	Order Details Table	New Bill Generated
		Update	Finished Order Table Updated	
	Account Delete	Delete	Cart Table	
		Update	Buyer Database Updated	
	Update Profile	Update	Buyer Database Updated	
	Guest Login	Create	Temp Cart Table	
	Guest Place Order	Update	Cart table Updated	
		Update	Current Order Table Updated	
		Update	Order Details Table Updated	

	Guest Logout	Delete	Temp Cart Table	
Admin				
	Add Products	Update	Product Table Updated	
	Edit Products	Update	Product Table Updated	
	Remove Products	Update	Product Table Updated	
	Block/Unblock Buyer	Update	Buyer Database Updated	
	Block/Unblock Seller	Update	Seller Database Updated	

## E-R Diagram

### Definition:-

- E-R Diagram is a graphical tool to represent the model, we logical structure of database (Entity and Relationship exist among entity set)
- Components of ER Diagram:-
  1. Entity
  2. Attributes
  3. Relationship
  4. Key attributes
- There are two types of Entity:-
  1. Strong Entity
  2. Weak Entity

### Symbols:-

Entity

Attribute

Relationship

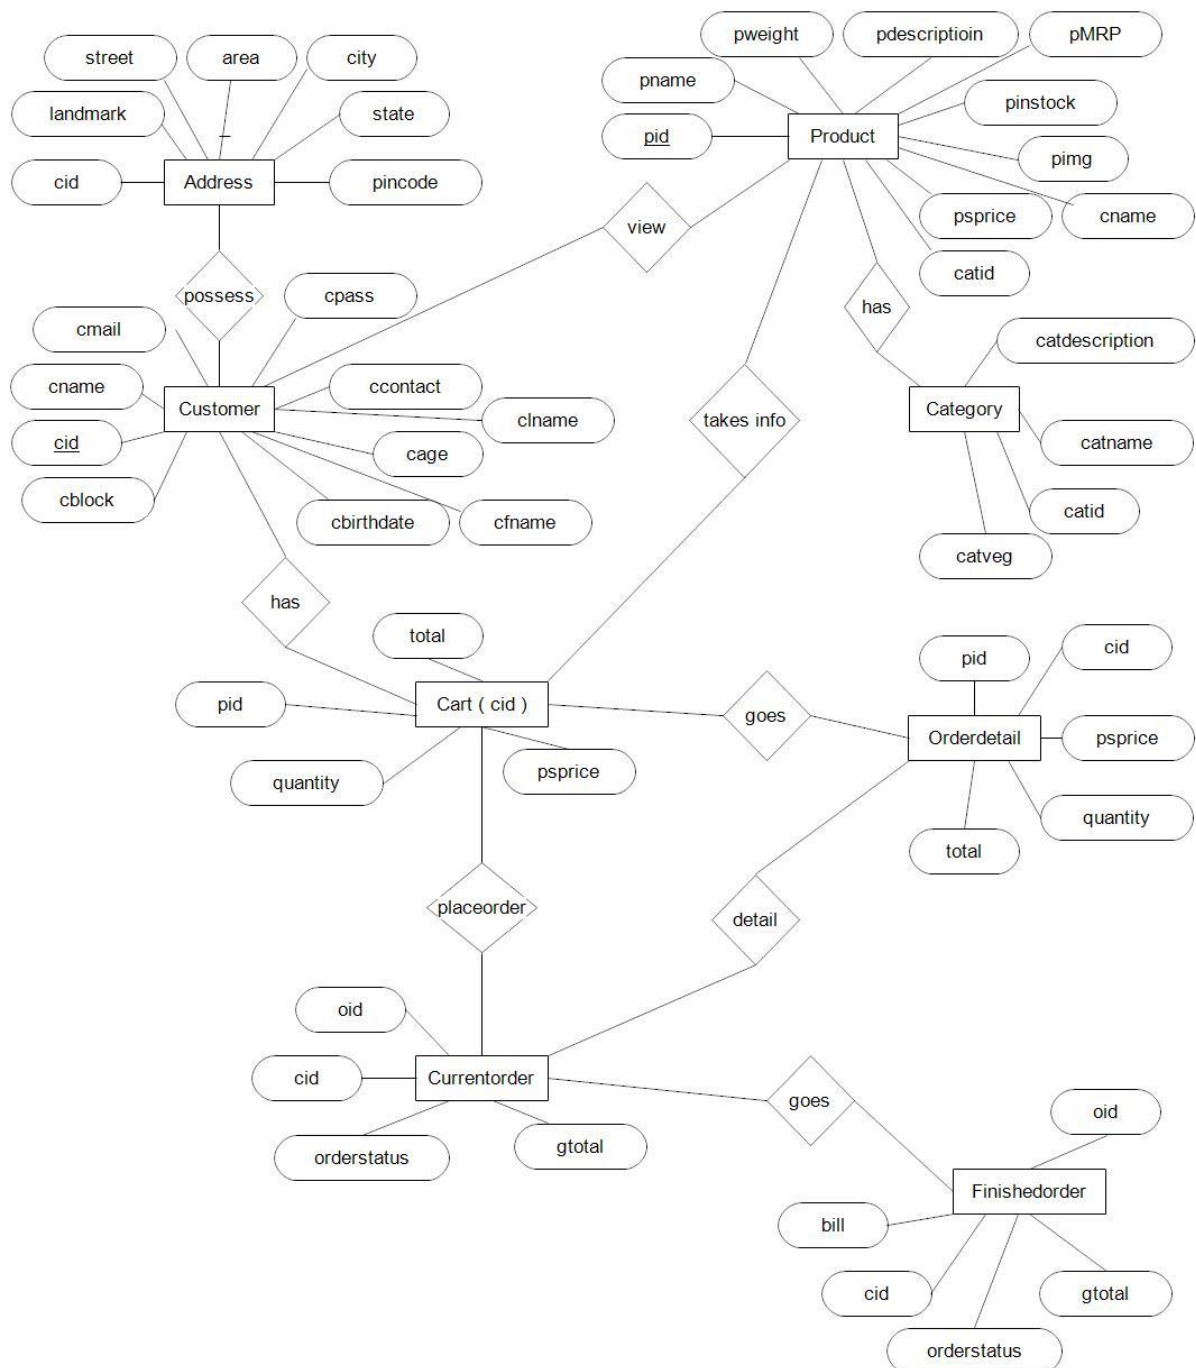

Weak Entity

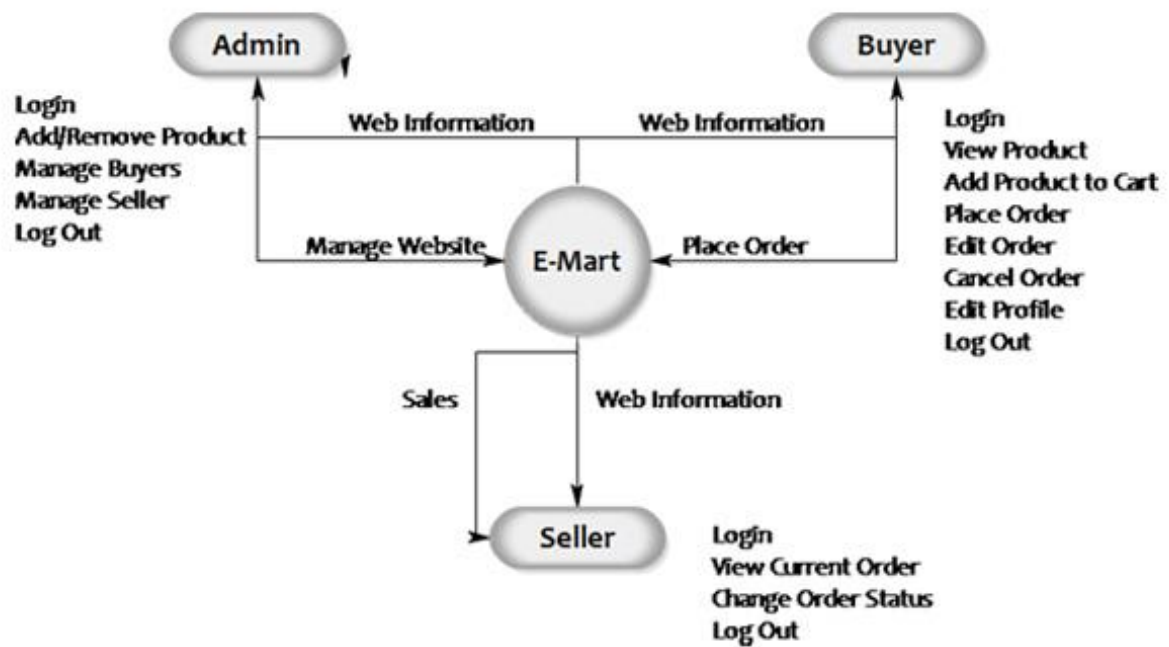

Weak Relationship

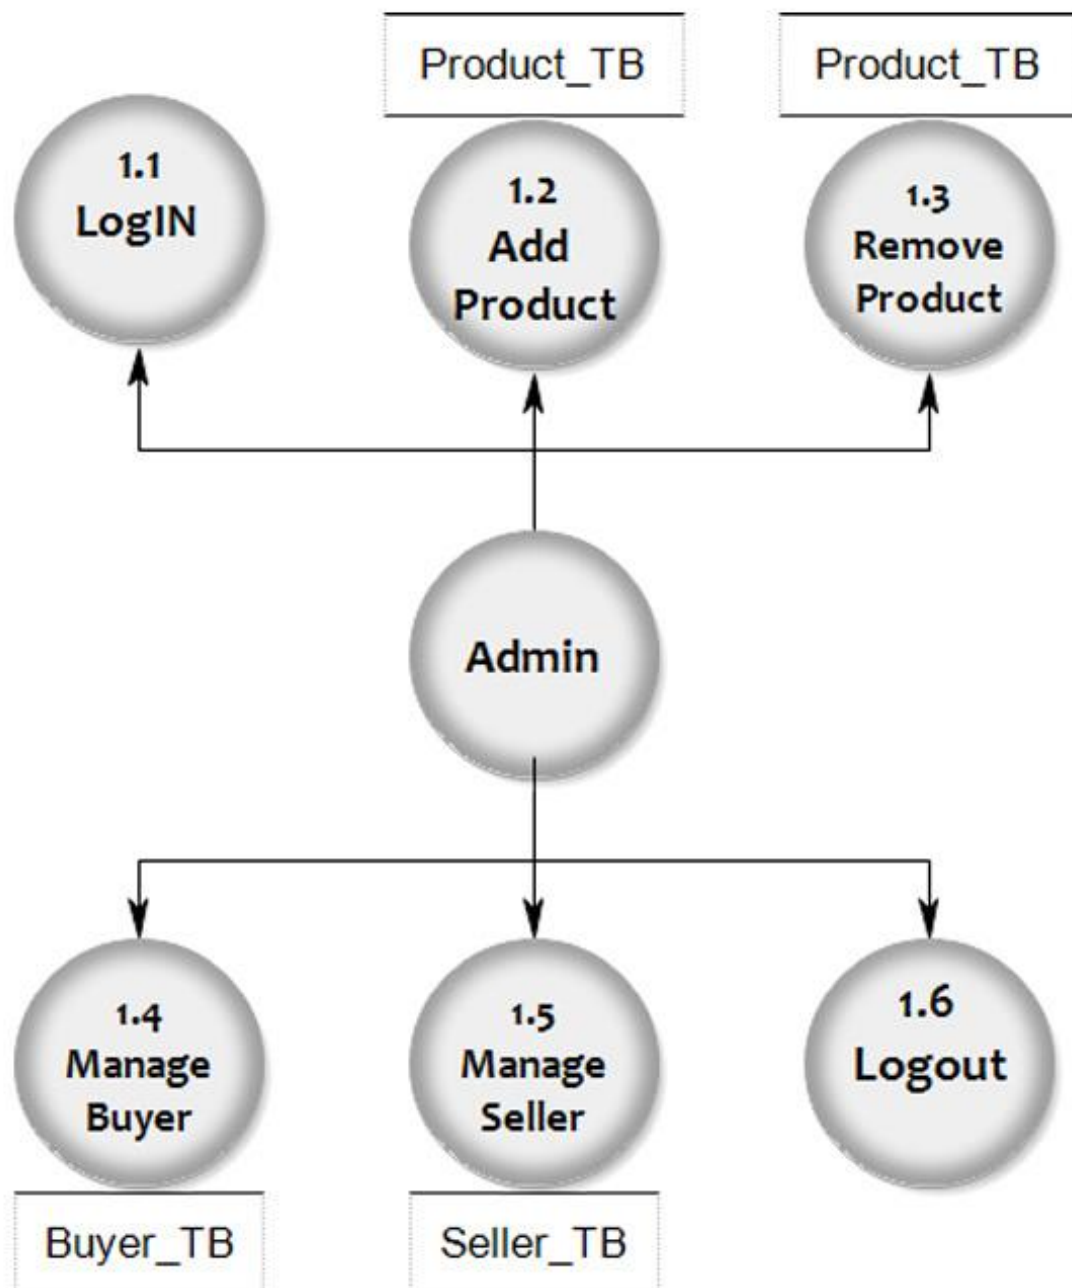

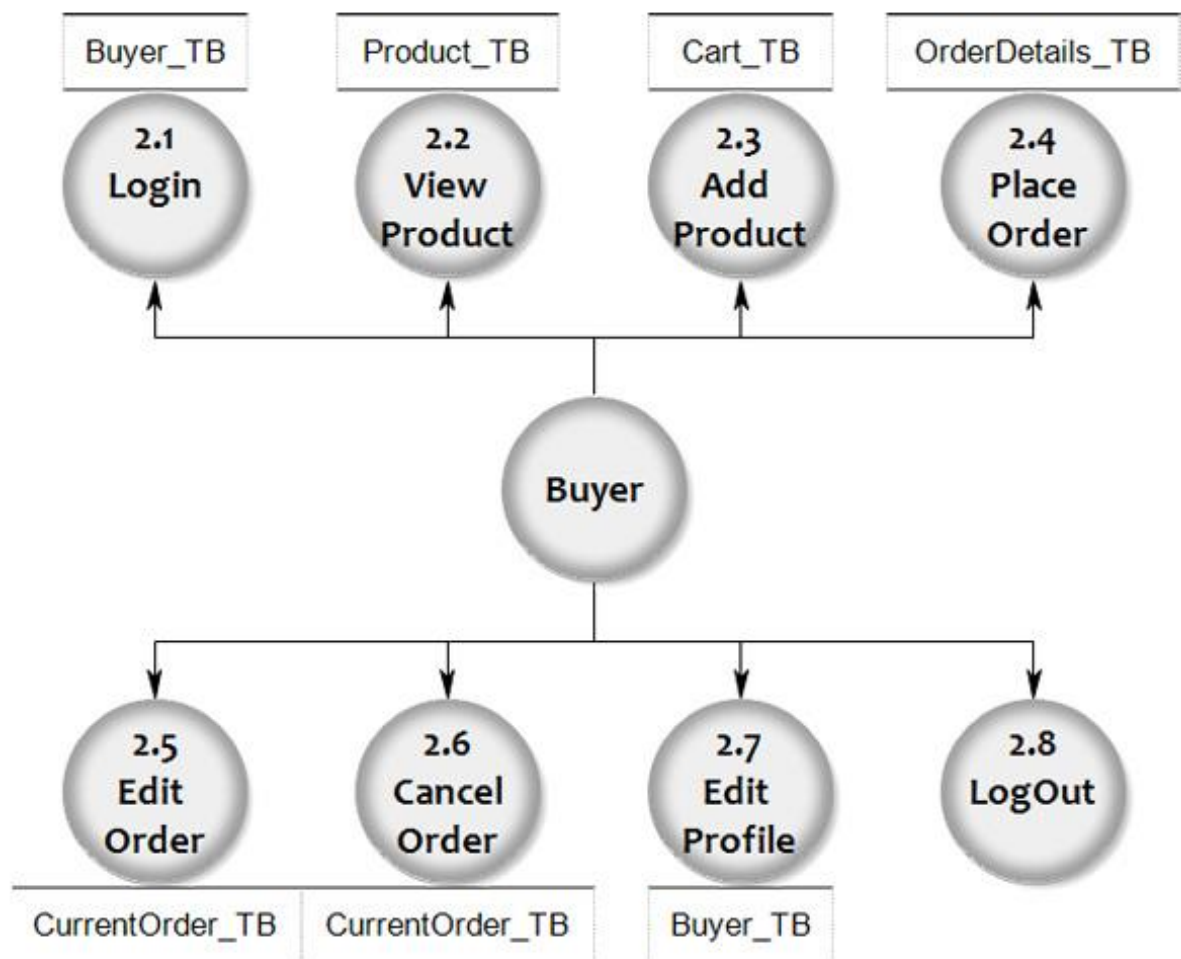

## E-R Diagram of E-Mart

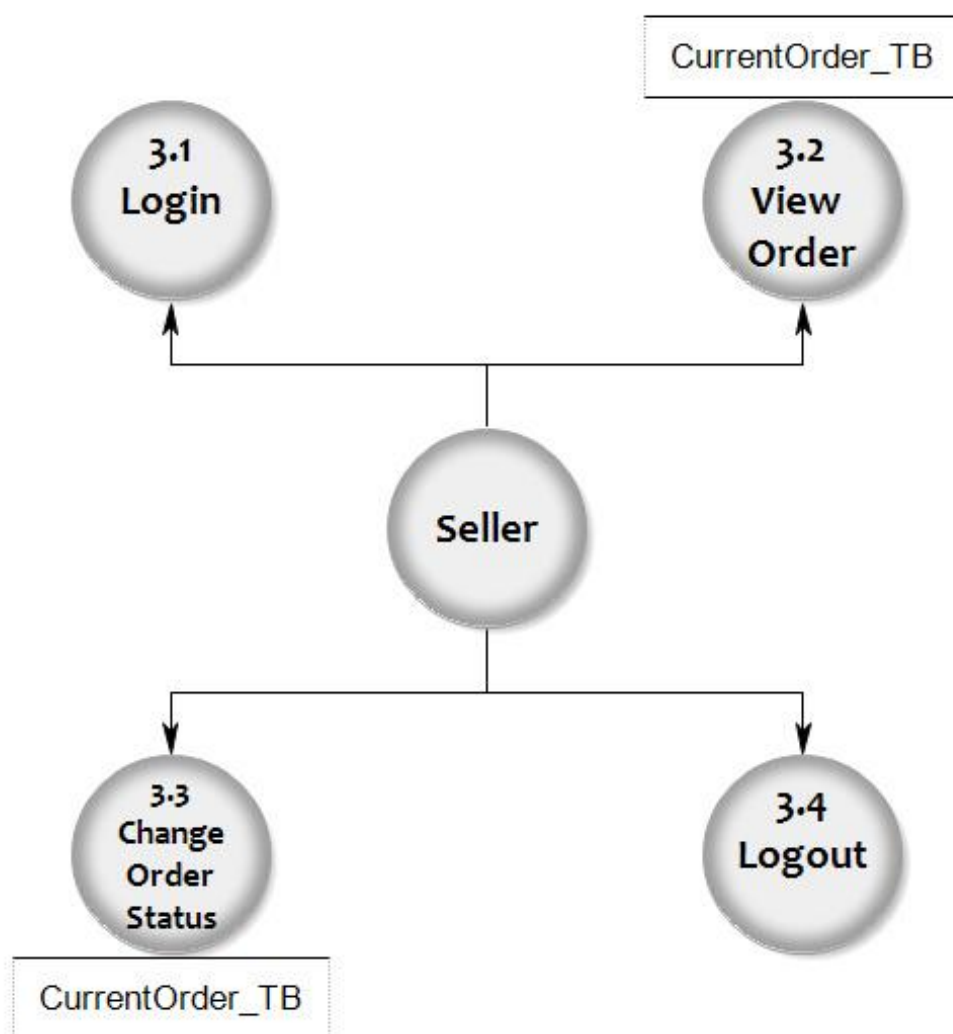

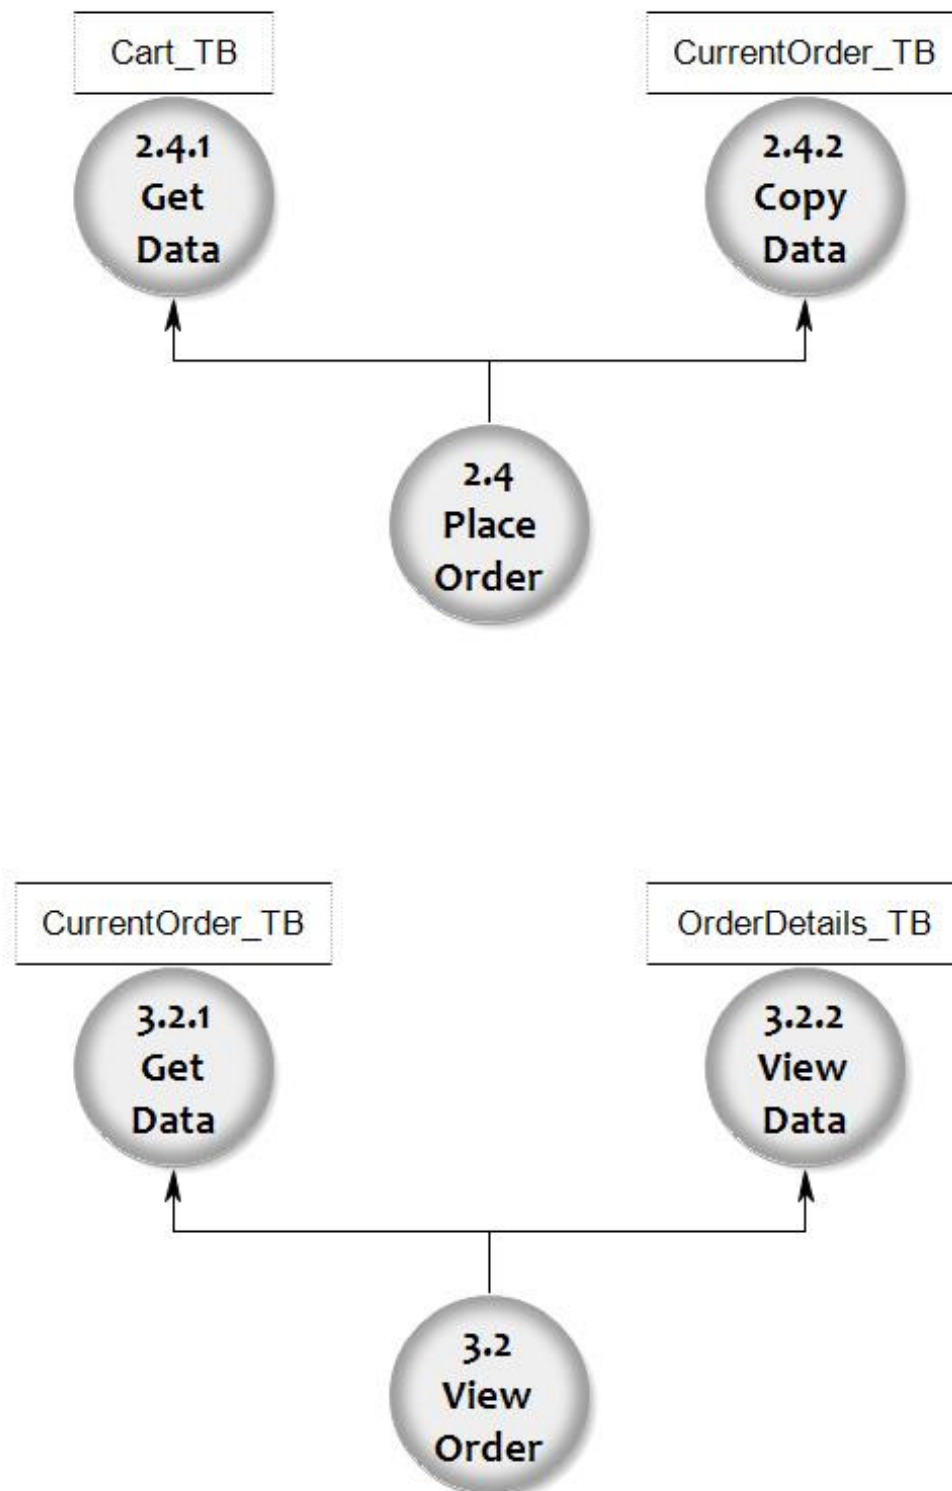

## **Data Flow Diagram**

## Data Dictionary

### Customer:-

Column Name	Data Type	Size	Constraint
Cid	Int	Auto Inc.	Primary key
Fname	Varchar	25	
Lname	Varchar	25	
Cname	Varchar	25	Unique
Cmail	Varchar	50	Unique
Cpass	Varchar	15	
Contact	Int	10	
Contact2	Int	10	
Gender	Boolean		
Cimg	Varchar	255	
Birthdate	Date		
Blocked	Boolean		

### Address:-

Column Name	Data Type	Size	Constraint
cid	Int	Auto Inc.	Foreign key
Add1	Varchar	100	
Add2	Varchar	100	
Landmark	Varchar	50	
Area	Varchar	25	
City	Varchar	25	
State	Varchar	25	
Pin code	Int		

### Cart:-

Column Name	Data Type	Size	Constraint
Pid	Int	Auto Inc.	Foreign key
Quantity	Int	10	
Sprice	Int	10	
Total	Int	10	

**Category:-**

Column Name	Data Type	Size	Constraint
catid	Varchar	15	Primary key
Catname	Varchar	25	
Catdesc	Varchar	500	
veg	Boolean		

**Current Order:-**

Column Name	Data Type	Size	Constraint
Oid	Int	10	
cid	Int	10	
Gtotal	Int	11	
status	Int	2	

**Finished Order:-**

Column Name	Data Type	Size	Constraint
Oid	Int	10	
cid	Int	10	
Gtotal	Int	11	
status	Int	2	
Bill	Varbinary	500	

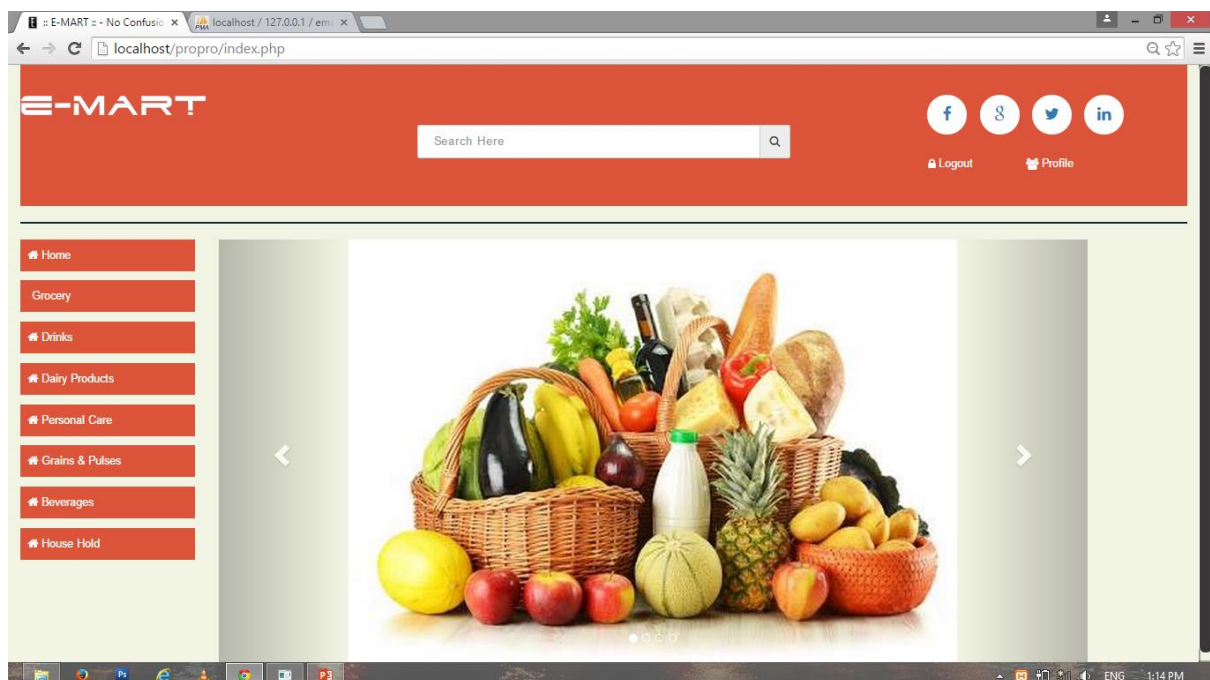

**Order Details:-**

Column Name	Data Type	Size	Constraint
Oid	Int	11	Foreign key
pid	Int	10	Foreign key
Quantity	Int	10	
Sprice	Int	10	
Total	Int	10	

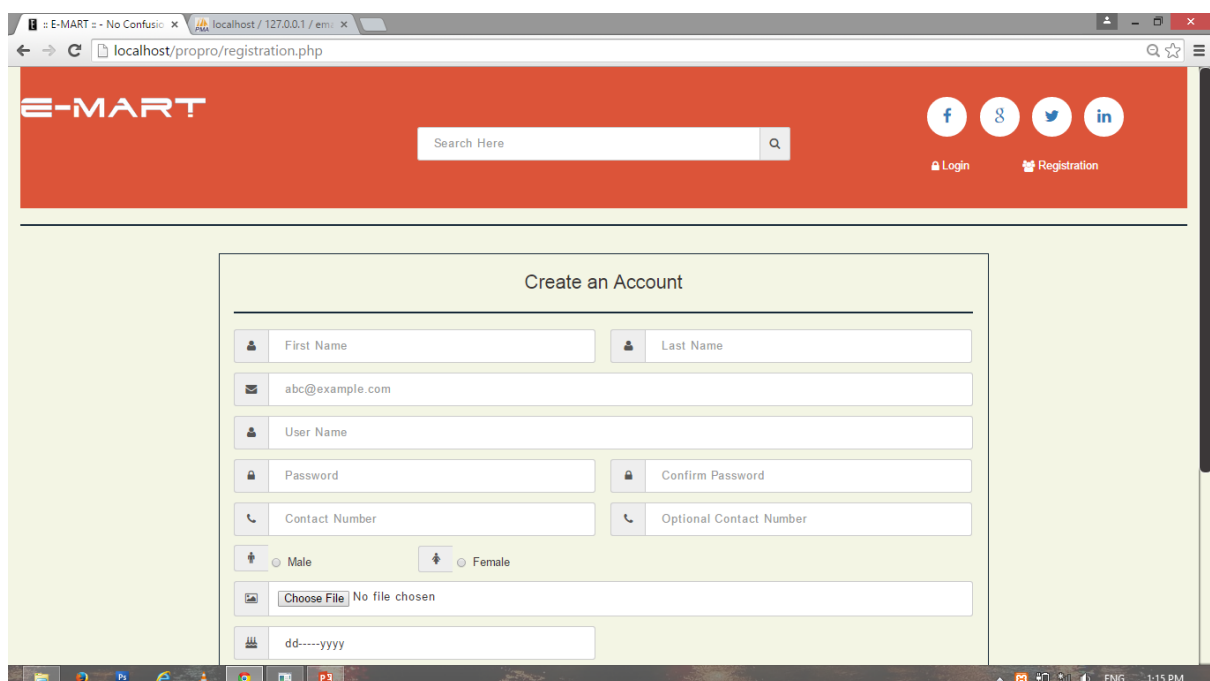

**Product:-**

Column Name	Data Type	Size	Constraint
Pid	Int	Auto Inc.	Primary key
Catid	Varchar	15	
Pname	Varchar	50	
Weight	Int	10	
Mrp	Int	10	
Sprice	Int	10	
Instock	Int	10	
Pdesc	Varchar	500	
Pimg	Varchar	1000	
Visible	Boolean		

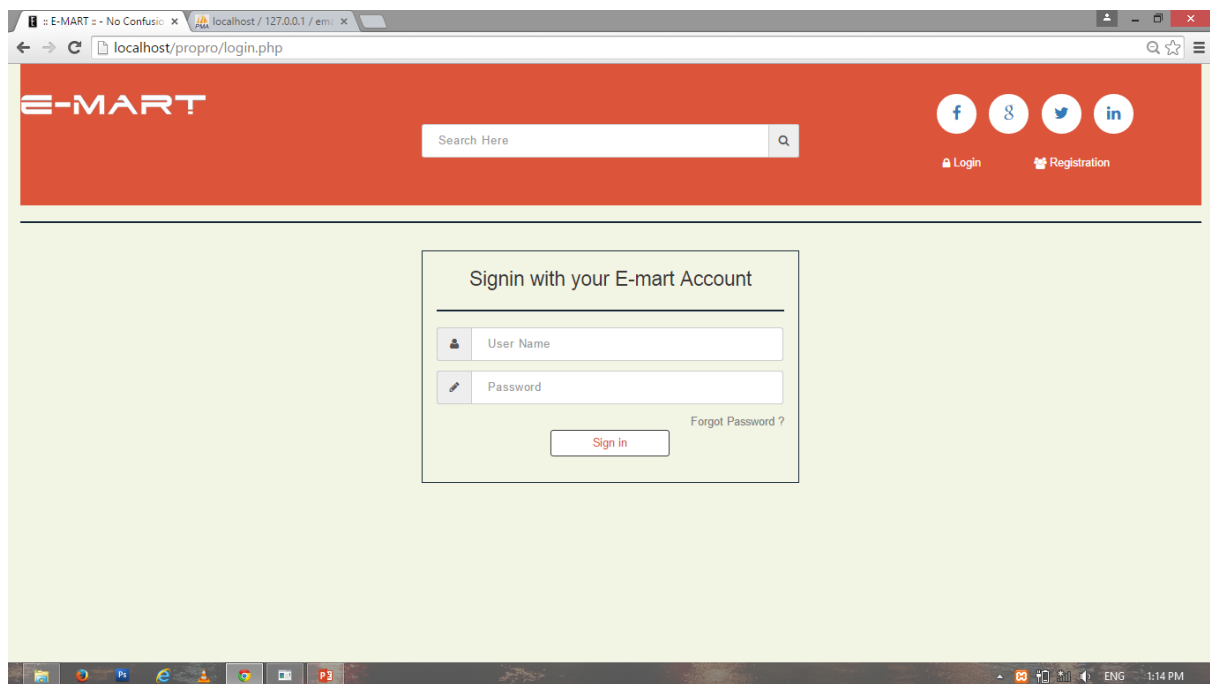

## Screen Shots

## Home

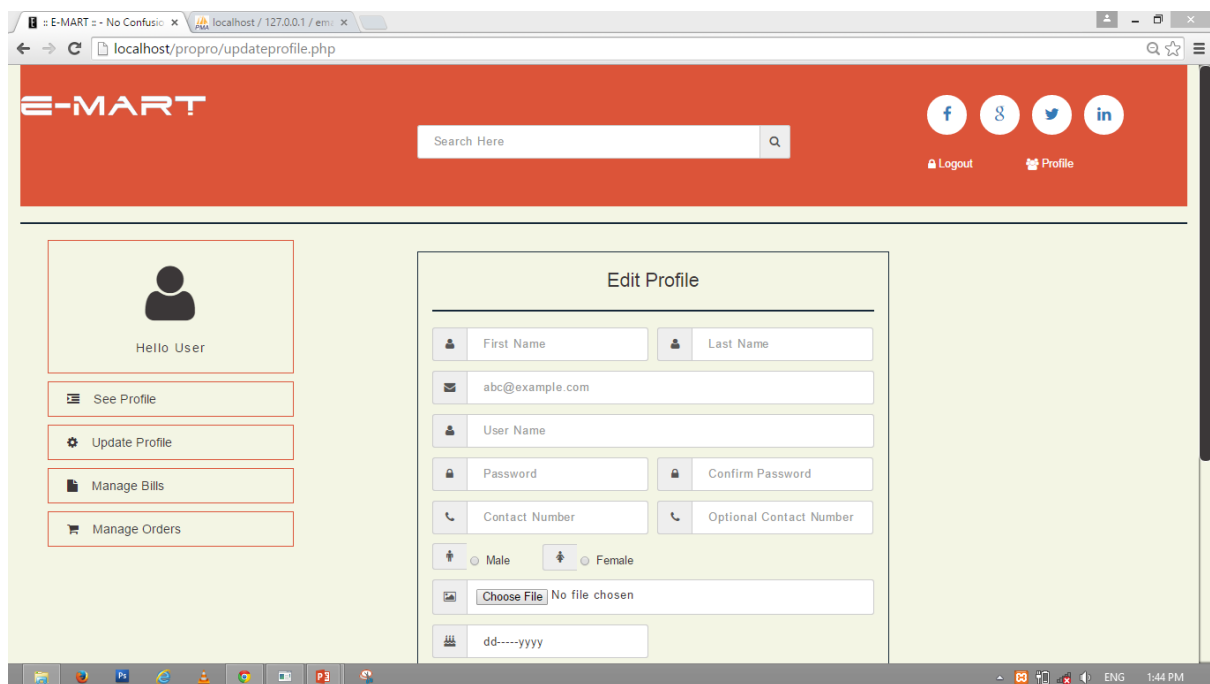

## Register

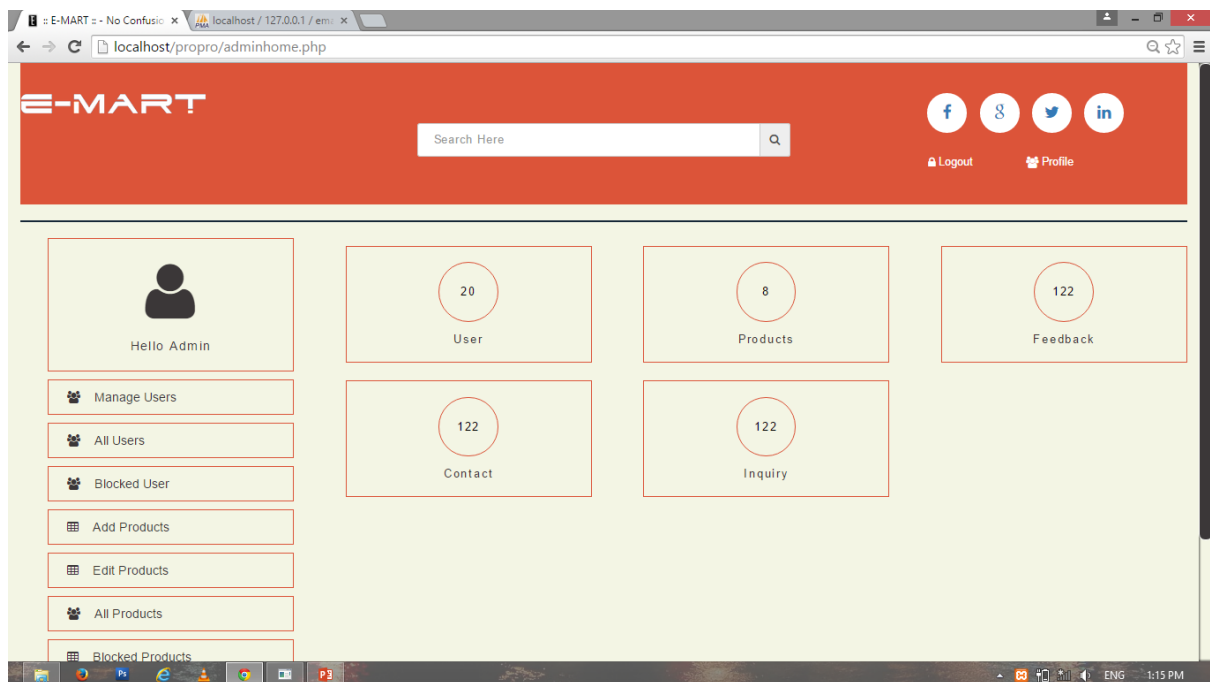

The screenshot shows the E-Mart login page in a web browser. The browser's address bar displays 'localhost/propro/login.php'. The page has a red header with the 'E-MART' logo on the left, a search bar in the center, and social media icons (Facebook, Google+, Twitter, LinkedIn) on the right. Below the social media icons are links for 'Login' and 'Registration'. The main content area is light green and features a central box titled 'Signin with your E-mart Account'. This box contains a 'User Name' input field, a 'Password' input field, a 'Sign in' button, and a 'Forgot Password?' link.

## Login

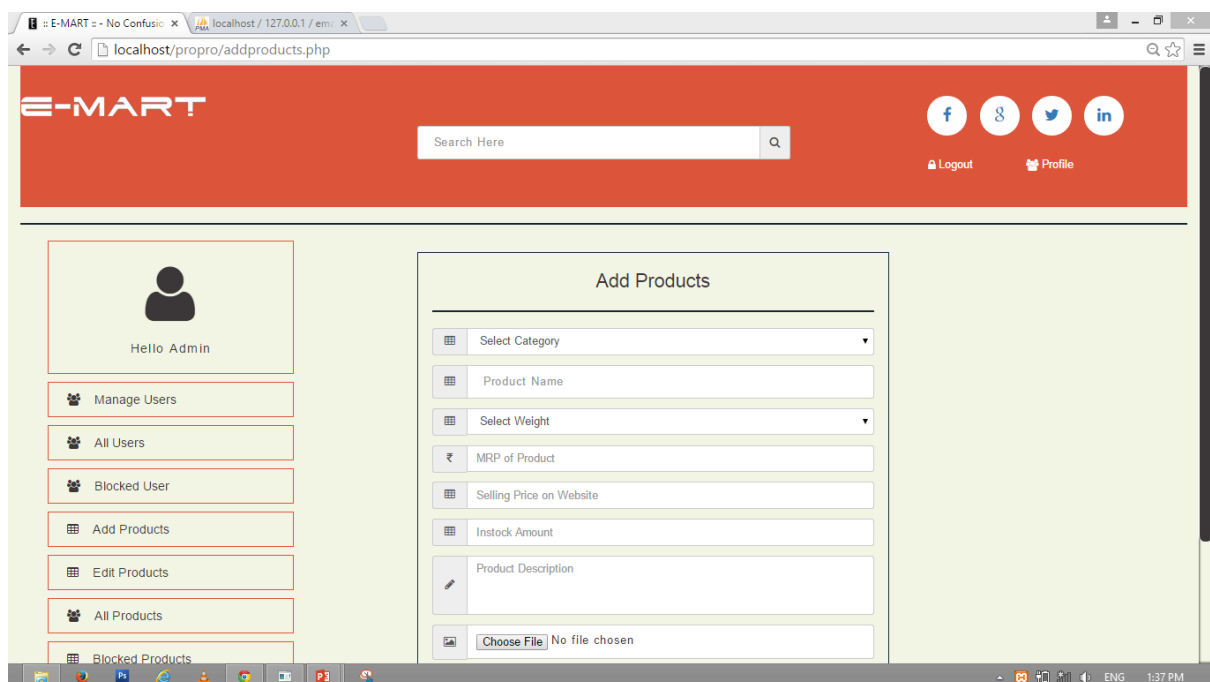

The screenshot shows the E-Mart user profile page in a web browser. The browser's address bar displays 'localhost/propro/updateprofile.php'. The page has a red header with the 'E-MART' logo on the left, a search bar in the center, and social media icons (Facebook, Google+, Twitter, LinkedIn) on the right. Below the social media icons are links for 'Logout' and 'Profile'. The main content area is light green and features a left sidebar with a user profile icon, the text 'Hello User', and four buttons: 'See Profile', 'Update Profile', 'Manage Bills', and 'Manage Orders'. The main content area is titled 'Edit Profile' and contains a form with the following fields: 'First Name', 'Last Name', 'Email' (pre-filled with 'abc@example.com'), 'User Name', 'Password', 'Confirm Password', 'Contact Number', 'Optional Contact Number', 'Gender' (radio buttons for 'Male' and 'Female'), 'Profile Picture' (a 'Choose File' button with the text 'No file chosen'), and 'Date of Birth' (pre-filled with 'dd-----yyyy').

## Edit Profile

## Admin Home

## Add Products

The screenshot shows the 'All Products' page of the E-MART application. The sidebar on the left contains a user profile section with 'Hello Admin' and a list of management options: Manage Users, All Users, Blocked User, Add Products, Edit Products, All Products, and Blocked Products. The main content area displays a table titled 'All Products' with the following data:

PID	CAT_ID	PNAME	WEIGHT	MRP	SPRICE	INSTOCK	PDESCRIPTION	PIMG	VISIBLE
1	0	megg	1	10	8	150	dfg.ahsgdhag		
3	0	kurkure	2	10	5	200	like		
4	0	lock	3	1310	1000	300	hiiii		
5	0	hello	1	15	12	100	khik		

## All Products

The screenshot shows the 'Blocked Products' page of the E-MART application. The sidebar on the left is identical to the previous page. The main content area displays a table titled 'Blocked Products' with the following data:

PID	CAT_ID	PNAME	WEIGHT	MRP	SPRICE	INSTOCK	PDESCRIPTION	PIMG	VISIBLE
2	0	baby	3	500	450	20	Just Hurry up

## Blocked Users

## **Advantages**

- E-mart offers several advantages to consumer and companies including improvements of productivity, customer satisfaction and general overall productivity.
- E-mart provides a wider scope of consumer that can be attained by the entrepreneur.
- This will create an easier way for customer to buy items that the business is offering and also can view reviews of the product and customer service.
- Customer would now be able to view and get update on their favourite brands or products and special discount that apply and would be able to make purchase any time.
- Customer will have direct access to the product information, company, promotion and much more.

## **Limitation**

- Geographical limitations.
- Product information must be update at arbitrary interval.
- Payment methods are limited.

## **Future Scope**

- Widen the range of product sold.
- Provide more payment methods.
- Widen the geographical area.
